

Sound Learning Systems

In conjunction with the MINDD Foundation

Learn from experts on how biomedicine, allied treatments and neuro therapies can help a child reach their full potential.

Allergies and nutritional deficiencies are often misdiagnosed as ADHD or behavioural disorders. Chronic infections often reoccur until germs are accurately identified and treated. Toxicity often drives both allergies and infections. The metabolic-immunologic-neurologic-digestive systems are all closely linked and require an integrative approach to achieve optimal mental and physical health. Treating underlying causes reduces the need for treating symptoms with antibiotics, psychostimulants, histamines, puffers, cortisone cream and surgery.

More importantly, an integrative approach can help prevent disease.

Integrative Solutions

Seminar November 29, 2008

Would you ask a child with a broken leg to run faster? Asking a child with ADHD or learning delay to sit still or study harder is equivalent if there is an underlying medical condition.

Nutritional deficiencies, infections and toxicity of heavy metals and chemicals are behind the alarming rise in childhood disorders.*

Integrating biomedicine (digestive health, diet, nutritional medicine, and detoxing) along with other therapies can greatly improve outcomes. The key is an individualised approach by a trained practitioner.

* *Dr. Kenneth Bock, Healing The New Childhood Epidemics*

Integrative care can help treat a wide range of symptoms that include;

ADHD
allergies
Asthma
Autism
anxiety
bedwetting
behavioural issues
chronic infections
depression
digestive disorder
dyslexia
dyspraxia
eczema
food sensitivities
memory recall
motor coordination
reflux
sleeplessness
stinky breath

Did you know?

- 1 in 165 US, 1 in 150 UK and 1 in 120 Australian children are diagnosed with Autism?*
- ADHD, allergies, autism, asthma often share an underlying chemistry characterized by nutrient deficiencies, infections, and toxicity.**
- 70% of the neurotransmitters in your brain are also in your gut
- A healthy diet is not adequate if the gastro intestinal tract is not properly absorbing nutrients.
- Antibiotics, "the pill", refined carbohydrates, lack of breast-feeding, heavy metals and chemicals all disrupt the microbe balance of the GI tract which can lead to gut & immune disorders and nutritional deficiencies.
- Seemingly healthy foods like milk, bread, soy, egg and corn can adversely affect concentration, behaviour and immunity in a person struggling with digestive disorder, intolerances or allergies.
- Nutritional deficiencies can cause ADHD, allergies, eczema, asthma, speech issues, sleeplessness, hyperactivity, chronic fatigue, poor concentration, chronic illness and more.

* *US CDC, UK Dept Health*

** *Dr. Kenneth Bock, Healing The New Childhood Epidemics*

Event Details

Time: 8.45am - 5.30pm

Date: Saturday November 29th, 2008

Place: Hellenic Club, Woden

Cost: \$65/person

Metabolic
Immuno
Neurological
Digestive
Disorders

Learn From the Worlds Best Mindds

Key Note Speakers

Phone 6231 9111 or 6291 0778 to register

Mindd Foundation is a non-profit Health Promotion Trust.

Sound Therapy **Dr Ron Minson**

Dr. Minson has furthered the original work of Dr Tomatis in the field of sound therapy and has extensive clinical experience in the therapeutic application of sound with children and adults. *Dr Minson and his wife Kate established and run the Center for InnerChange.*

Osteopathy **Dr Maxwell Fraval**

Osteopathic treatment of children with learning difficulties can be the key to change as it is the basis of body function. Maxwell will discuss the neurology of learning difficulties. *Dr Fraval trained at the British School of Osteopathy, pioneered the first Osteopathic Paediatrics Masters degree in Australia and runs the Hillside Clinic in Canberra.*

Biomedicine **Dr Jonathan Turtle**

Biomedicine combines identifies and treats the core cause of illness from a biochemical view with a focus on using diagnostic tools to treat the individual. Dr. Turtle treats a range of illness through biomedical intervention, including ASD, ADHD, learning delay, depression, bipolar disorder, schizophrenia, anxiety and post traumatic stress syndrome. *Dr Turtle has a Biomedical practice based in Canberra at the Oasis Medical Centre.*

Neuro-Development **Mariane Judd**

Neuro-developmental issues can disrupt the development and integration of the senses of movement, touch and balance and subsequently effect learning and behaviour of children diagnosed with ADHD, dyslexia, dyspraxia and learning difficulties. *Mariane is a Psychologist and Extra lesson Practitioner in Canberra.*

Language & Development **Martha Mack**

Martha uses a multi-disciplinary approach to assess and assist children with auditory processing issues, auditory hypersensitivities, language and developmental delays and behavioural difficulties. She will discuss her work with Autism patients. *Martha is a Psychologist and founder of the Listen and Learn Centre in Melbourne.*

Auditory Programs **Harry Armytage**

The Integrated Listening System home and the clinic-based programs for the Dynamic Listening System have been very successful helping a variety of clients. Since 2004 Harry has been running the Opening-the-Door program developed by Dr Maxwell Fraval which targets those with significant learning or developmental delays. *Harry works with Dr. Fraval at the Hillside Clinic, Canberra. www.opening-the-door.com*

Visual Integration **Susan Larter**

Vision plays a pivotal role in the development of the skills that underpin academic learning and sports. *Sue is a Behavioural Optometrist who has practiced in Sydney for over 20 years. She will discuss both the mechanical and cognitive aspects of vision that can be assessed and trained to enhance performance.*

Sensory Integration **Jean Loth**

Sensory integration and sound therapy can be used in combination to treat children with sensory and behavioural difficulties. *Jean is an Occupational Therapist and Extra Lesson Practitioner who runs the Melville Occupational Therapy and Extra Lesson Centre in Perth. She will discuss Auditory Processing, ADHD and other learning difficulties.*

Sydney - Mindd International Forum On Children 16-19 May '09

Biomedicine, Nutrition, Allied Treatments, Neuro-Therapies

Integrative Solutions for ADHD, Asthma, Allergies, Autism, Infections, digestive disorder, learning delay and more

Find out how Integrative healthcare that includes biomedicine (diet, detoxification, digestive health and nutritional medicine) allied therapies and neuro-development can optimise a child's mental and physical health. Best outcomes lie in a professional team well-trained in assessing and treating the individual and in parents-carers able to manage treatments and compliance.

- Science Stream; Professional training in Biomedical intervention with Defeat Autism Now! The latest in biomedical and integrative research, assessment, testing and treatment. DAN! and RACGP accreditation.
- Expo promoting Mindd-endorsed products and services for diet, nutritional medicine, lifestyle, healthy home, education, neuro and behavioural therapies.
- Carer Stream; Education for parents, educators and carers in how to optimise mental and physical development with proper selection and sequencing of biomedicine, allied therapies and behavioural and neuro-therapies; how to create a safe home and environment; how to prepare delicious foods that nourish your child; understanding therapies (auditory, visual, sensory integrations, retained primitive reflexes, allergy elimination)

Keynote Speakers

Dr. Elizabeth Mumper (USA),
Education Director, Defeat Autism Now!,
Medical Director, Rimland Center

Dr. Bryan Jepson (USA), author,
Changing The Course of Autism,
Medical Director, Thoughtful House

Dr. Woody McGinnis (USA/NZ), Director
Oxidative Stress in Autism Study,
Autism House, NZ

Julie Matthews (USA),
author, Nourishing Hope

Registration Form

Time: 8:45am - 5:30pm

Date: Saturday, November 29, 2008

Place: Hellenic Club, Woden

Cost: \$65/person

Advanced bookings essential. Please make all payments by cheque, bankdraft or money order to Mindd Foundation.

To reserve a place, please send this form with payment to:

Registration: Phone 6231 9111 or 6291 0778 or send check to; Sound Learning Seminars, 51 Learmonth Drive, Kambah 2902
