DC, MSN, BSN, RN, NP-C, DNP(c), DC, DCM,
DCN, DAAIM, DCBCN, DACNB, FACNB, FICC.

**A 2-day program that will
transform your practice**

Practitioner Training

20 - 21 May 2017, Sydney

For all Integrative practitioners wanting to optimise patient outcomes with hands-on understanding of the integration between neurology, immunity, infectious disease and metabolic factors.

Topics

- Is it gut-brain or brain-gut?
- Nutrition & blood sugar impact on the brain
- Hyper kinetic disorders (ADHD, OCD, TICS)
- Brain - immune interactions (brain autoimmunity)
- Impact of infections on the brain (strep, mycoplasma, tic-borne)
- Understanding the vagus nerve and vestibular system

Learning Objectives

- Nutrients that feed and protect the brain and promote neuroplasticity
- Common nutrient-drug interactions that all practitioners need to know
- Cutting edge physiological mechanisms in neurological disorders
- Peripheral & Central nervous system exams with clinical gems (demo with lecture)
- Primitive reflex exam for developmental delays (demo)
- Ocular examination to determine brain function
- Communication skills with patient, including kids
- Differential diagnosis abilities

Benefits

- Expert, non-biased training focused on optimising patient outcomes
- CPD points (see mindd.org for more detail)
- Listing at mindd.org
- Membership in MF private practitioner Facebook group
